

Abandoned Mine Safety Fund Annual Report

December 1, 2009

Statutory Authority: ARS §27-129: Locating abandoned mines

A. The state mine inspector shall establish a program to locate, inventory, classify and eliminate public safety hazards at abandoned mines ...

In addition, ARS § 27-131: Abandoned mines safety fund; annual report

A. The abandoned mines safety fund is established consisting of:

1. Gifts, grants, and contributions specifically designated for the fund.
2. Monies that may be appropriated by the legislature to the fund to match the gifts, grants and contributions based on the preceding year's expenditure report required under subsection D of this section

B. The state mine inspector shall administer the fund. Monies in the fund are exempt from lapsing pursuant to section 35-190

C. Monies in the fund are continuously appropriated to the inspector to ensure public safety at abandoned mines on land owned by this state as provided by section 27-129. The inspector shall use monies in the fund to pay contractors for actual abatement costs to fill, fence or plug shafts and adits and not to pay administrative salaries and other costs. The inspector shall consult with the state land commissioner to identify and prioritize the abandoned mine sites on state lands to be considered for abatement.

D. Each year the inspector shall submit an annual report to the joint legislative budget committee on or before December 1 concerning the expenditure of monies from the fund and contributions to the fund during the preceding fiscal year. The report shall itemize each expense paid from the fund and shall describe the actions taken to ensure public safety.

Financial Statement:

The following is a summary of financial transactions during State Fiscal 2009:

Activity	Amount	Closure	Entity
Beginning Balance	\$126,761.37		Arizona State Mine Inspector
Funds Received July 31, 2008	\$50,000.00		Teck Cominco
Ending Balance June 30, 2009	\$144,817.15		

The following is a summary of mine features secured during State Fiscal Year 2009:

Summary of Future Projects:

Eighty-four projects covering seventeen mine sites have been identified for closure in FY2010 on State managed lands in Arizona. The most significant types of mine hazard features are open shafts, adits, and stopes. These areas typically have high use for backcountry touring and off highway vehicle activities, rock hounding, and recreational mineral Remediation at key sites is guided by focused inventory assessments starting with those sites that are clustered in proximity to sites with high public exposure.

Priority Physical Safety Hazard Sites for closure FY2010: Additional work may be planned for areas not included in the list.

The Arizona State Mine Inspector's ability to accomplish this workload will be based on level of funding. We believe we have made significant progress in the last year in establishing AML teams that are poised to accomplish the work, in raising the awareness internally and externally of the importance of the AML program to public health and safety, and in garnering other agency management support to move forward with this strategy.
